EDUCATION

University of Kansas

Bachelor of Arts in Computer Science

Lawrence, KS

Aug. 2023 – Dec 2027

Sirindhorn International Institute of Technology (SIIT)

Study Abroad Program

Bangkok, Thailand

Jan. 2026 – May 2026

TECHNICAL SKILLS

Languages: Python, Java, C, C++, C#, Rust, Elixir, Go, R, Scala, SQL, TypeScript, JavaScript, HTML/CSS

Frameworks: React.js, Redux.js, Node.js, Django, Flask, PyTorch, TensorFlow, REST API

EXPERIENCE

Cybersecurity Intern

Brites Technology Solutions

Sept 2025 – Present

Bangkok, Thailand

- Built a real-time backend service that cross-references detected data against a pre-existing database
- Wrote optimized SQL and Python and used internal REST APIs to send data alerts to databases
- Reduced alert time generation from manual batch processing (hours) to seconds

Quality Assurance Intern

Oigetit.ai

Sep. 2025 – Dec 2025

Remote

- Identified, documented, and reported HTML/CSS software bugs and defects using daily detailed reports
- Assessed software design and overall user experience from a quality and usability standpoint

PROJECTS

TrainTrace BKK | *Python, TypeScript, CSS/HTML*

Nov 2025 – Present

- Built a Python script to extract 500+ data points from official Bangkok BTS and MRT timetables
- Used obtained data to develop an app that tracked and optimized train routes, as well as calculated fare costs
- Algorithmically optimized train routes, considering transfer times and walking distances along with fare calculations

FlickPicker | *JavaScript, TypeScript, Python, Docker*

Jan 2025 – Present

- Built a full-stack Chrome extension utilizing a personally developed machine learning model to generate personalized media recommendations from a user's watch history
- Developed and trained ML models for content-based filtering and user preference prediction
- Implemented continuous delivery using Render to build the plugin upon new a release

Self-Operating LiDAR Braking System | *C, Python, Raspberry Pi, TensorFlow, UART*

Jan 2025 – Present

- Designed and developed real-time measurement logic to trigger multi-level braking systems
- Integrated a Deep Neural Network model from video input via UART between a Raspberry Pi and a microcontroller
- Led a 2-person team to deliver a full-stack prototype with a 100% demo success rate in multiple test scenarios

LEADERSHIP

Machine Learning Team Lead | KU Software Engineers Club

Jan 2024 – Present

- Facilitate weekly programming workshops mentoring students on Git, Programming languages, development tools, web and app development, and deployment
- Collaborated with exec board to identify and implement strategies to boost community impact

In Game Leader | KU Deadlock Esports Program

Aug 2026 – Present

- Captained and led in-game strategy for a top-25 team in the 190-team College Deadlock Collegiate League.
- Guided the team to the league's highest-ranked division through consistent performance in weekly matches.

AWARDS

Hackathons: (HackKU) **Best Beginner Project** VisionEQ

Cargill Scholars Scholarship: based on academic excellence and leadership potential
